

PRESS RELEASE

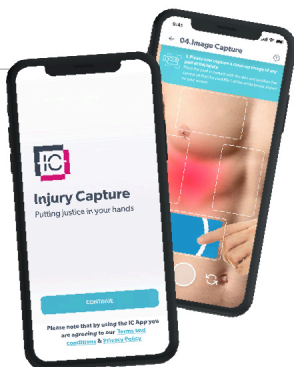

Anatomap achieves full UKAS accreditation for both ISO/ 27001: 2013 and BS 10008: 2014 standards

Having been audited by The British Standards Institution (BSI), Anatomap Limited is very proud to announce that we have now achieved full UKAS accreditation for both ISO/IEC 27001:2013 (Information Security Management (ISMS)) and BS 10008:2014 (Evidential Weight and Legal Admissibility of Electronic Information) standards.

It's now full steam ahead in our mission to protect victims and support justice.

With full accreditation we can now proudly release our first app, Injury Capture for public use. With our users assured that the information we handle is secure and that all electronic information which is captured via the collection of Anatomap Applications (including the Injury Capture app), and stored, transferred and produced by Anatomap, can safely be used as evidential legally admissible evidence in any form of litigation.

INJURY CAPTURE - THE END TO END, FULLY ACCREDITED SOLUTION, WHICH WORKS WITH OR WITHOUT INTEGRATION INTO EXISTING SYSTEMS

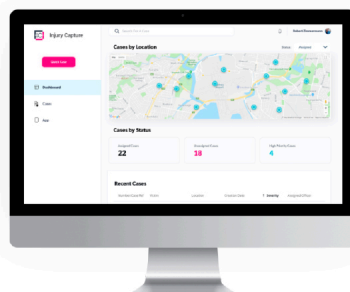

FRONT OFFICE

CAPTURE LEGALLY ADMISSIBLE FORENSIC EVIDENCE IN JUST A FEW TAPS

- ▶ Capture scaled imagery of the injuries
- ▶ Provide details of the incident
- ▶ Upload media and medical records
- ▶ Make notes and submit S.9 statements
- ▶ Invite others to contribute evidence

VICTIMS, THEIR RELATIVES AND THE WIDER PUBLIC CAN NOW CAPTURE AND SUBMIT FORENSIC EVIDENCE

BACK OFFICE

REVIEW, ASSIGN AND DISPATCH

- ▶ Review submissions
- ▶ Assign a crime reference
- ▶ Assign an officer
- ▶ Manage and send links
- ▶ Map and analyse data trends

OR INTEGRATE INTO YOUR EXISTING CAD

MIDDLE OFFICE

MANAGE THE CASE FILE THROUGH TO CHARGING AND PROSECUTION

- ▶ Review evidence
- ▶ Request further evidence
- ▶ Assign an officer
- ▶ Print and download media and pre-populated statements
- ▶ Share evidence with the CPS or colleagues

OR INTEGRATE WITH YOUR EXISTING RMS

Injury Capture

Putting justice in your hands

Use of the Injury Capture app will revolutionise the victim and policing lifecycles, allowing the public to provide the police, in a matter of a few taps, with admissible forensic evidence that will enable the police to quickly act to protect those most vulnerable and through a successful prosecution, safeguard them from further harm.

Adoption of the app will:

1 EMPOWER MORE VICTIMS TO REPORT A CRIME

The app provides a means for a person to report a crime in a matter of minutes. It quite literally puts justice in your hands.

2 PROVIDE ENHANCED EVIDENCE AND EASIER ACCESS TO JUSTICE

The app enables victims themselves (and together with other stakeholders, including friends, relatives, the police, medical professionals and witnesses) to collect and submit robust forensic evidence which is all entirely evidentially admissible.

3 SPEED UP THE INVESTIGATION PROCESS

The app should enable the police to gather strong evidence and investigate the crime far more rapidly. If a witness has supporting evidence it can be requested via the contributors function and uploaded in a matter of seconds. With quicker charging decisions and/or more early guilty pleas, victims will be more effectively safeguarded from any further harm.

4 BOOST CONVICTION RATES AND BUILD TRUST

Enhanced evidence collection and the enabling of more crimes to be effectively investigated and prosecuted will improve conviction rates and increase public confidence.

5 REDUCE THE RATE OF CRIME AND REOFFENDING

This successful cycle should further empower victims and hopefully deter those who contemplate violent crime; in the longer term, leading to an overall reduction in crime.

IT'S ABOUT MAKING PEOPLE FEEL SAFE TO SAY SOMETHING

Injury Capture

Putting justice in your hands

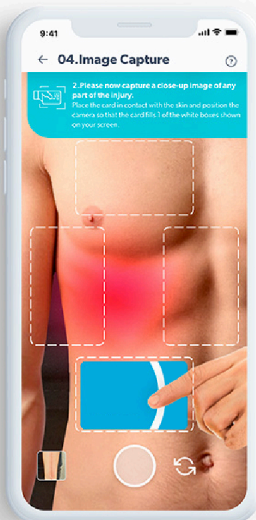

We hope that with the support and engagement of the Government, the Ministry of Justice, the Home Office, the Crown Prosecution Service (CPS), Police and Crime Commissioners, the National Police Chiefs Council (NPCC), the Chief Constables from all 43 Territorial Forces, Victims Commissioners, Victim Support Services and others, that the app can be made available to users across the entirety of the UK.

For more information or to discuss the options for data transfer into your territorial police force please contact simon.franc@anatomap.com

EMPOWERING VICTIMS, ENHANCING EVIDENCE, BOOSTING CONVICTION RATES, BUILDING TRUST

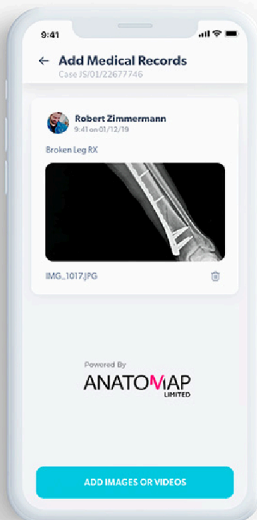

Capture the injuries

Sound evidence, captured in a matter of minutes

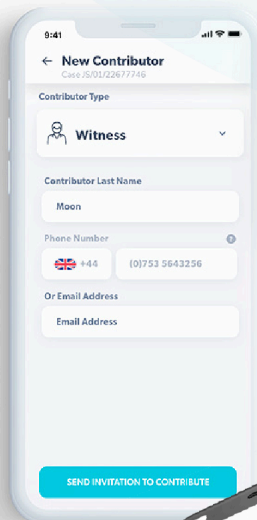

Upload supporting media

Upload scene images, videos, medical records, etc.

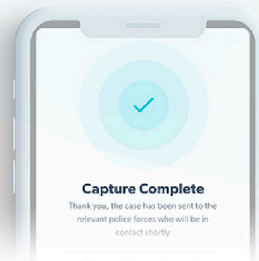

Invite others to contribute evidence

Enhancing evidence collection through collaboration

Submit to the police

Empowering Victims

This forensic evidence can then be used to swiftly prosecute those responsible

HAVE YOU OR YOUR RELATIVE BEEN A VICTIM OF CRIME AND SUFFERED INJURIES?

Use the Injury Capture App to accurately record the injuries so that it can be used as evidence to swiftly prosecute those responsible.

On submission, your record will be sent directly to the police.

You can then rest assured that the evidence is secure and action will be taken.

EVIDENCE, CAPTURED AND REPORTED IN JUST A FEW SHORT TAPS
